

REMIS cold rooms

Product catalogue for
cold rooms 2020/2021

Pioneer, developer and forward thinker

Whether for refrigerated wall multi-decks or refrigeration and chest freezers, with REMIS you get more than 40 years of experience in the development of radiation-resistant materials, attractive, low-resource and flexibly adjustable covers for all standard refrigeration cabinet types.

REMIS glass covers and insulating glass doors are an investment in cost effectiveness, climate protection customer acceptance and the future!

Attractive and contemporary

REMIglas enables premium, modern and cost-effective goods displays. With REMIglas you can offer your customers optimally refrigerated products. The appealing design of the easy-to-use glass covers results in an attractive look and an inviting shopping atmosphere.

Profitable and climate-friendly

With REMIglas you can save up to 77% of refrigeration costs. This lowers CO₂ pollution and your costs. Moreover, it enables you to actively support climate protection which, in turn, has a positive effect on your reputation. The glass covers pay for themselves within a short space of time thanks to reduced electricity expenses.

A worldwide patent application has been filed for transparent spacer
and already issue in: USA, China, Australia, Japan, Canada and Mexico*

Everything from a single source: REMIS cold room systems

The advantages at a glance

- Individual adjustments of dimensions and layout to suit local conditions
- Maximum energy saving with maximum transparency (Ug 1,1)
- Use as a storage and/or as sales area
- Efficient and sales-promoting presentation of goods
- The apertures in doors at the sales side can be selected freely from a range of grid sizes
- From design to installation -> all from a single source
- All REMIS cold rooms are designed in-house and can be adapted to suit individual requirements
- Promotional display (LED-backlit surface) on request

A worldwide patent application has been filed for transparent spacer
and already issue in: USA, China, Australia, Japan, Canada and Mexico*

Efficient down to the last detail: REMIS cold room - Entrance door

The advantages at a glance

- Available as a swing door in RAL7004 or RAL7016
- Able to open in both directions with limit stops
- Stops can be fitted at right and left sides
- Size 980 mm x 2040 mm for a simple and unobstructed entrance into the cold room
- Self-centring mechanism
- Handles on both sides in stainless steel look and stop bumper on the glass to protect it against collisions from shopping trolleys

Glass doors for refrigerated wall multidecks: SafeFlex*

The advantages at a glance

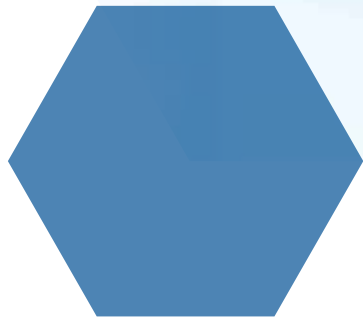

- Uniform door -> customised use
- Minimum spare parts requirements since, for example, the right door can also be used on the left
- Can be installed in the opening or without a canopy panel up to the top of the cabinet
- Can be customised to meet your specifications

* For technical information, see pages 18-19

** As per DIN EN 23953 and also depending on the refrigeration cabinet type, refrigeration system, and number of times the cabinet is opened etc.

Perfect and sales-promoting presentation of goods: StoreFlex

The advantages at a glance

- Standalone multideck system for storage facilities and for the presentation of goods
- Convenient two-sided access to goods
- Shelving system with backloader function
- Infinitely variable goods divider
- Shelving units can be adjusted to three different angles of inclination
- Individual equipment of shelving units possible with rollers or sliding supports
- Goods stoppers prevent goods from falling out
- Price indications possible as an option directly on the shelving system

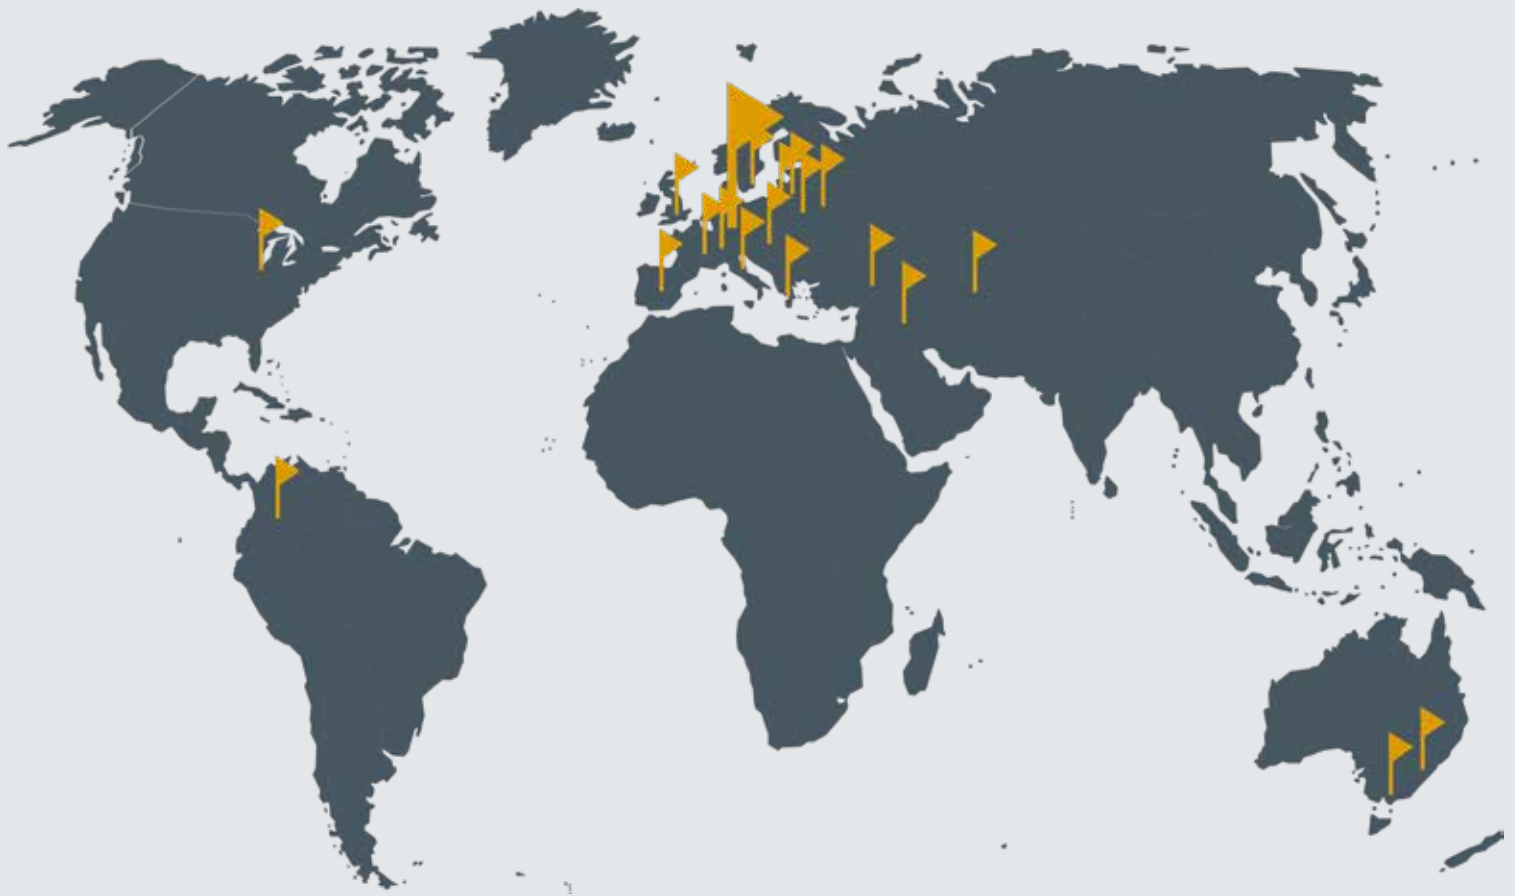

Sales promotion with enhanced profit margins: REMIS Material feed systems

RollerStar - the benefits at a glance

- Orderly and clearly laid-out presentation of goods
- Demarcation of goods can be adjusted to suit size of packaging
- Plexiglass panel as a material stopper, preventing goods from toppling over or slipping
- Extremely easy feed on plastic rollers, making it easy to slide goods into location
- Great labour saving
- Easy to clean making it particularly hygienic
- Can be filled from both sides
- No sorting by sell-by date required because the 'older' filled goods are removed first, and the other items simply slide into place afterwards (First-In / First-Out principle)
