REMIS GLASS

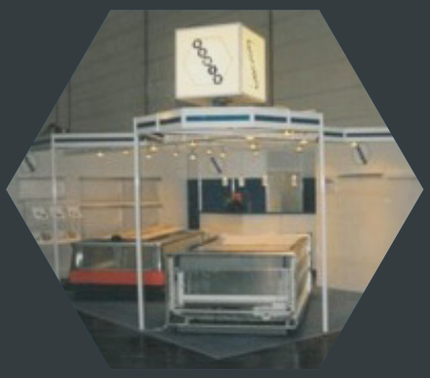
Insulated glass doors and covers for refrigerated display cabinets

Saving energy in food retail

REMIS – 50 years of innovation based on family tradition

Since 1976, REMIS has stood for ideas that make a difference. When we developed the first covers for refrigerated display cabinets five decades ago, we changed an entire industry – laying the foundation for our global success. Today, our high-quality glass doors and covers, which combine design, functionality and sustainability, are used in supermarkets around the world.

In 1979, development and production began on the first radiation-reflecting roller blinds for the refrigerated display cabinet industry.



In 1996, we developed the first energy-saving glass cover for refrigerated and frozen food islands.

In 1998, the first retrofittable insulating glass sliding door came onto the market.

As an independent family business based in Cologne, we have always stood for reliability, quality and innovation – and for shaping the future of refrigerated display cabinets together with our partners.

Flex HD

Energy savings in food retail

Benefits for you:

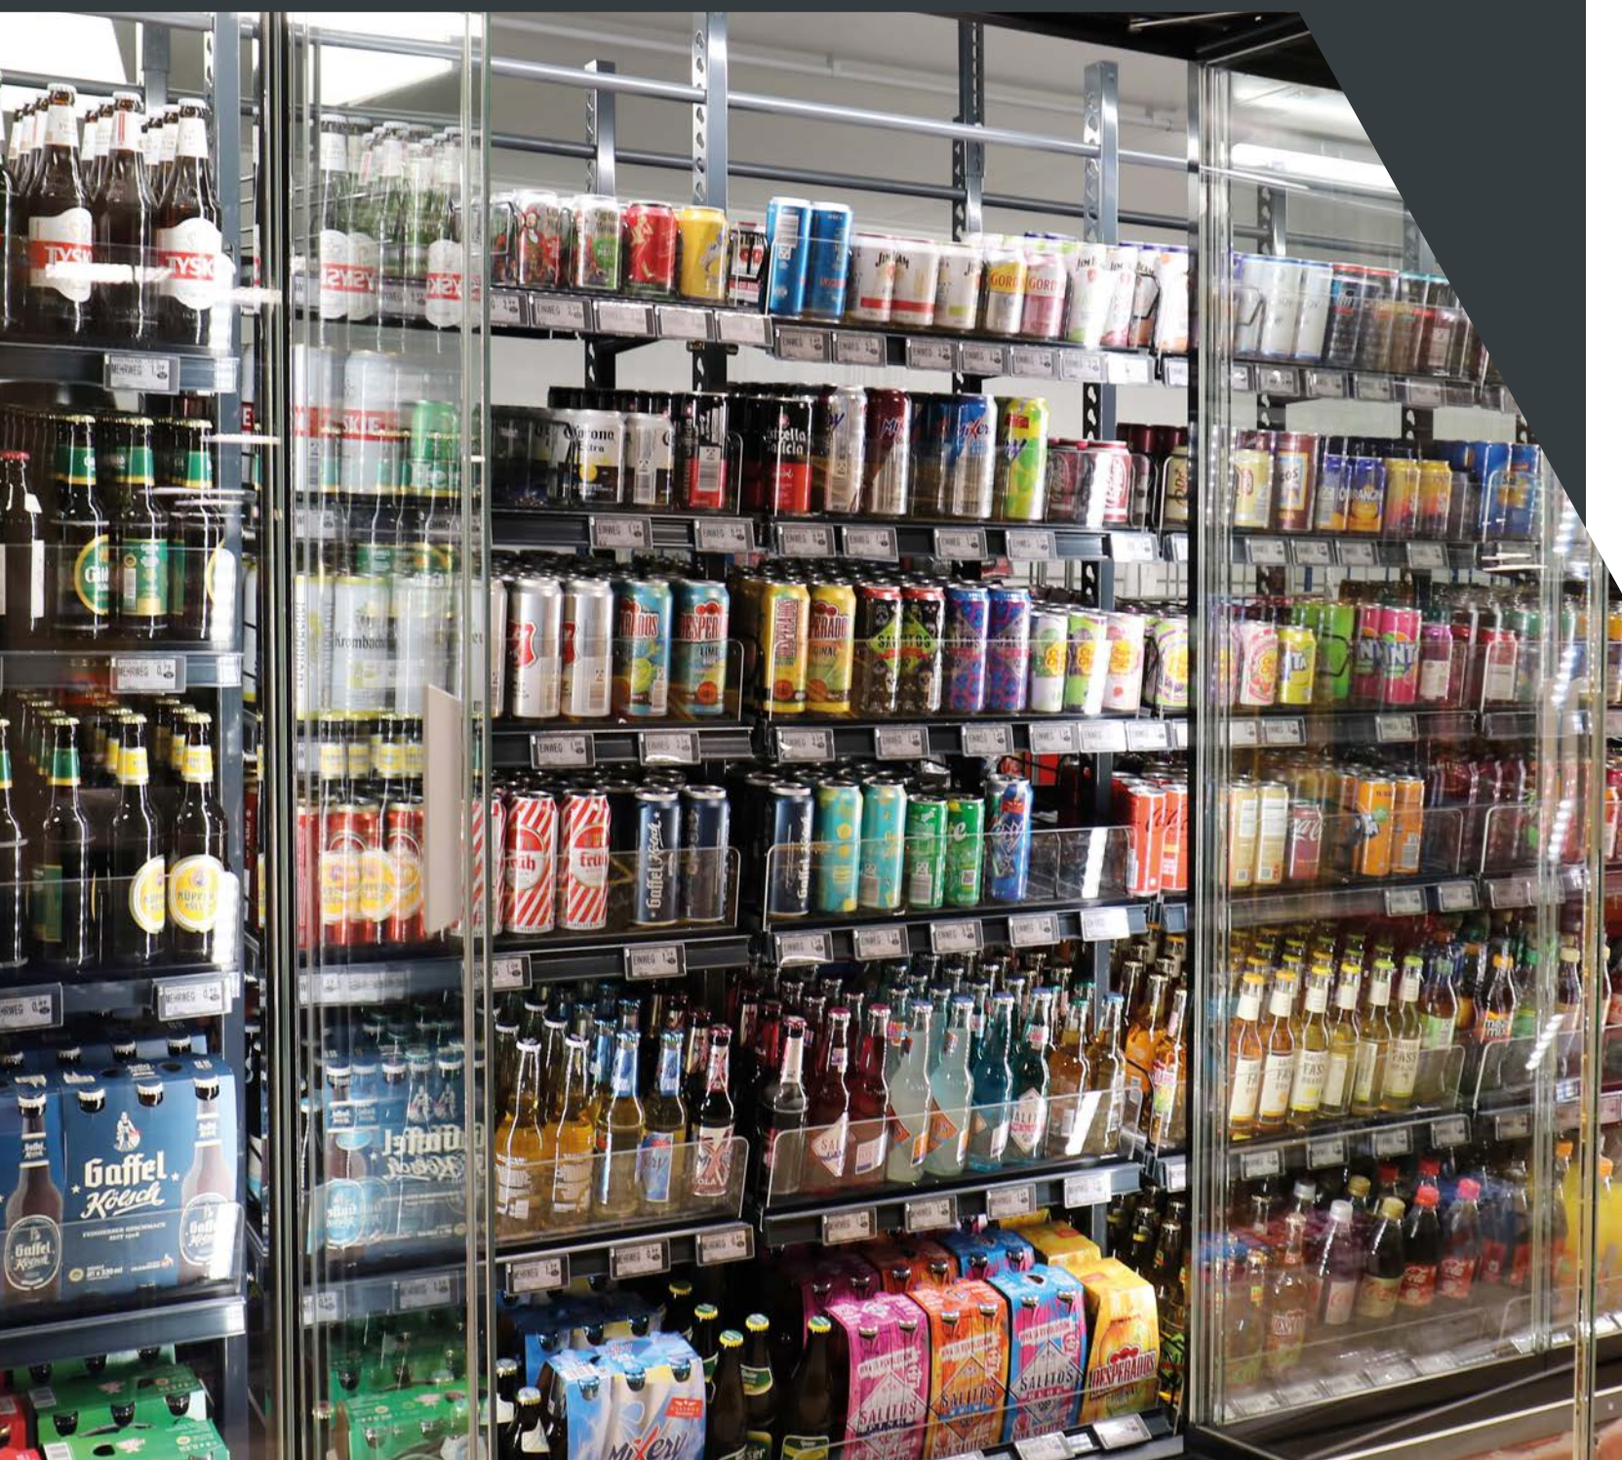
- Significant energy savings
- Improved product presentation
- Reliable technology
- Retrofit-compatible
- Compliant with legal requirements

Benefits for your customers:

- Improved hygiene
- Pleasant shopping atmosphere
- Premium appearance
- Enhanced visibility and accessibility

Benefits for the environment:

- Reduced energy consumption
- Very long service life
- Future-proof
- Made in Germany



Technical highlights

- Insulated glass door for refrigerated display cabinets
- Standard width: 625 mm | Height: 800 - 2000 mm (customisable)
- Glass: 4 / 14 / 4 with argon filling
- Transparent glass spacer
- Self-closing hinge
- LED-compatible

Flex SD

The glass door solution for refrigerated display cabinets - clever, convenient, reliable

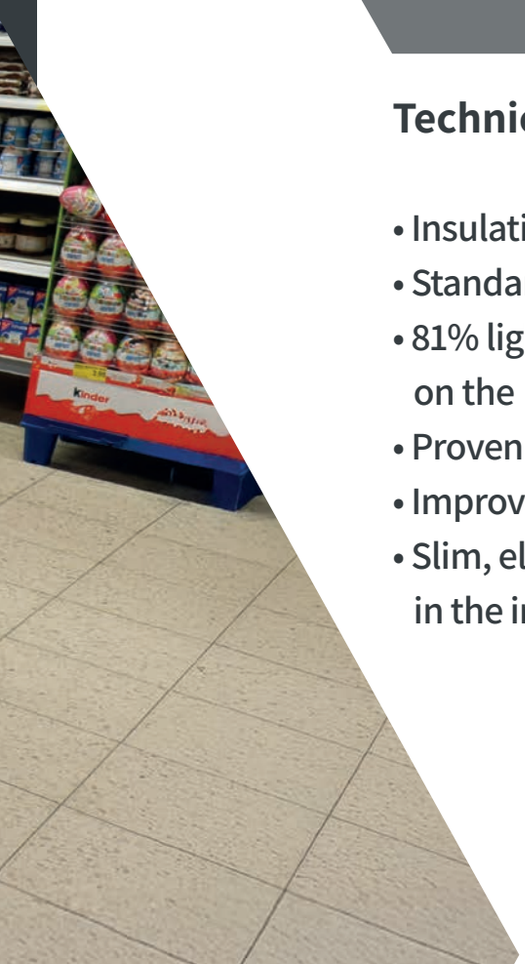
Advantages at a glance:

- For all shelves, including semi-vertical ones
- Few parts – less maintenance, quick assembly
- Easy tilt and angle adjustment
- Optional: self-closing, LED bracket
- Lift-off protection
- Smooth opening and closing over many years
- Made in Germany

Vertical

Technical highlights

- Insulating glass 4/8/4 mm
- Standard or transparent spacer
- 81% light transmission (best value on the market)
- Proven technology for 20 years
- Improved TDA
- Slim, elegant door for more space in the interior



Eco Neo

Efficiency meets flexibility – our modular glass covers for refrigerated and frozen food islands

Our glass covers for refrigerated and frozen food islands combine high energy efficiency with flexible adaptability and modern design. Developed for OEM applications as well as retrofitting – with high-quality materials and maximum design freedom.

Advantages at a glance:

- Highly efficient, modular design – stabilisation of the refrigerated cabinet
- Customised design options
- Long service life and easy maintenance
- Smooth opening and closing over a long period of time

PushT Push Slide

Technical highlights

- Maximum glass surface area
- Lightweight 4 mm tempered safety glass panes
- Running profiles made from easy-care PVC profiles
- Stainless steel reinforcement in load-bearing components
- Invisible but easily removable anti-lift protection

Flex FD

Unlimited flexibility thanks to modular design

Advantages at a glance:

- Low energy consumption
- Optimal product presentation
- High quality ensures long service life
- Made in Germany

Technical highlights

- Individual modules
- Full glass
- Heated frame
- Optional door heating
- All-round magnetic seal
- 90-degree lock
- Door stopper

REMIS Health Centre E.V.

In 2003, we started with a solar container that still supplies electricity to the local infirmary today. This state-of-the-art power supply system was developed in collaboration with the Institute for Solar Energy Supply Technology (ISET e.V.) at the University of Kassel. A modern water treatment plant has since been added. In 2008, REMIS was appointed official sponsor by the Gambian government. The REMIS HEALTH-CENTRE KÖLN DARSILAMI IN THE GAMBIA E.V. was established. In March 2014, Margarete and Paul Isfort were awarded honorary citizenship of the village, a great honour according to African custom.
